

CANNON OFFSHORE FUNDS

Deposit Plus Fund October 2013

INVESTMENT OBJECTIVE

The Fund seeks to achieve its investment objective by investing in deposits, short dated government bonds, short dated corporate bonds and selected funds with low portfolio duration where appropriate. Bonds will generally be of 5 year maturity or less and the average portfolio maturity will generally be 3 years or less. Substantial exposure to gilts and deposits may also be held from time to time.

INVESTMENT COMMENT

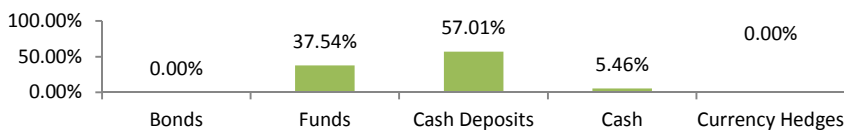

Equity markets continued to advance due to the US avoiding an extended or a board government shut down and favourable Chinese manufacturing reports. European reports showed improvement in economic activity and lead indicators which offset continuing uncertainty about the composition of the German government. Bond markets held steady in the case of 10 year UK government and more risky bond issues gained, reflecting market sentiment for risk assets in general. For the month overall, government bond indices increased in value as did most corporate bond indices. Lower grade bonds improved more than investment grade bonds. More positive reports from the US and Europe, along with good company news led equity markets higher, including emerging markets equities. The fund returned 0.33% for the month taking its year to date performance to 1.57%.
