

CANNON OFFSHORE FUNDS

Deposit Plus Fund January 2014

INVESTMENT OBJECTIVE

The Fund seeks to achieve its investment objective by investing in deposits, short dated government bonds, short dated corporate bonds and selected funds with low portfolio duration where appropriate. Bonds will generally be of 5 year maturity or less and the average portfolio maturity will generally be 3 years or less. Substantial exposure to gilts and deposits may also be held from time to time.

INVESTMENT COMMENT

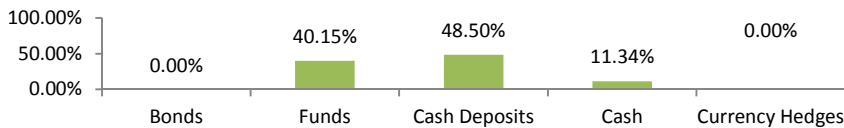

Equity markets pulled back during the month, particularly during the last week. This and emerging market sell offs were triggered by further tapering of bond purchases by the US Central bank and concerns about Chinese growth. The US, UK and Europe all continued to show signs of economic improvement, particularly in unemployment figures and continued falls in inflation. Government bonds rallied on moderate growth and inflation, along with some risk aversion in equity markets. Corporate bond markets also rallied during the month. The fund returned 0.16% for the month.

Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. The units of Cannon Deposit Plus Fund are traded at ruling prices and are priced weekly using the forward pricing method. A schedule of fees and charges and maximum commissions is available on request from Cannon Asset Management Limited, The Management Company. Cannon Deposit Plus is a collective investment scheme, which invests in other collective investment schemes, which levy their own charges, together with direct investment in investment grade bonds. Commission and incentives may be paid and if so, are included in the overall costs.
