

CANNON OFFSHORE FUNDS

Deposit Plus Fund November 2014

INVESTMENT OBJECTIVE

The Fund seeks to achieve its investment objective by investing in deposits, short dated government bonds, short dated corporate bonds and selected funds with low portfolio duration where appropriate. Bonds will generally be of 5 year maturity or less and the average portfolio maturity will generally be 3 years or less. Substantial exposure to gilts and deposits may also be held from time to time.

INVESTMENT COMMENT

Europe continued to disappoint with its economic growth and very low inflation, increasing expectations of monetary easing. The US and UK growth appear satisfactory and their respective central banks continued to be quite dovish about the timing of increasing interest rates to avoid reducing growth. Subdued inflation and wage growth are now becoming the key criteria for these recovering economies now that US quantitative easing has ceased. Consequently interest rates for bonds fell further this month. Both China and Japan also eased monetary policy, either through interest rates or bond purchases. Further inflation falls are expected due to a sustained period of low oil prices, though longer term this will stimulate economies and may bring forward interest rate rises. The fund returned 0.22% for the month taking the year to date figure to 1.62%.
