

CANNON OFFSHORE FUNDS

Cannon Deposit Plus Fund
May 2017

INVESTMENT OBJECTIVE

The Fund seeks to achieve its investment objective by investing in deposits, short dated government bonds, short dated corporate bonds and selected funds with low portfolio duration where appropriate. Bonds will generally be of 5 year maturity or less and the average portfolio maturity will generally be 3 years or less. Substantial exposure to gilts and deposits may also be held from time to time.

INVESTMENT COMMENT

May ended with the UK looking increasingly weak due to political change. With the imminent election in June, polls are indicating a significant decline in the Conservative popularity. This could lead to a weaker position in Brexit negotiations and a weaker pound. In addition there are signs that inflation is starting to outstrip wage growth in the UK. By contrast, Europe appears to be accelerating and France elected a reformist President, reducing political risks. US economic activity appears to have slowed somewhat during the first quarter, similar to prior years. French government bonds rallied. US bonds remained stable, shrugging off political concerns about President Trump. UK rates remained largely unchanged despite continuing and increasing political uncertainty.
