

CANNON OFFSHORE FUNDS

Cannon Deposit Plus Fund December 2017

INVESTMENT OBJECTIVE

The Fund seeks to achieve its investment objective by investing in deposits, short dated government bonds, short dated corporate bonds and selected funds with low portfolio duration where appropriate. Bonds will generally be of 5 year maturity or less and the average portfolio maturity will generally be 3 years or less. Substantial exposure to gilts and deposits may also be held from time to time.

INVESTMENT COMMENT

The global economy is showing signs of increasingly synchronised growth and modestly rising inflation. Oil Prices continue to climb, reflecting increased demand and more balanced supply which should increasingly raise prices generally and act as a tax on economic activity. The US approved tax cuts for corporations and the wealthy, but at the cost of much higher projected debt. Infrastructure spending is also being promised, though how it is paid for and impact on inflation is concerning. US interest rates rose during the month. Equity markets ignored rising rates and focused on growth, rising energy prices and tax cuts. As a result they rose further, finishing the year at or near all time highs in most cases. Corporate bonds also rallied, particularly investment grade bonds. Government bonds struggled in the face of the US tax cuts and increased US borrowing and generally positive economic news.
