

CANNON OFFSHORE FUNDS

Cannon Deposit Plus Fund July 2018

INVESTMENT OBJECTIVE

The Fund seeks to achieve its investment objective by investing in deposits, short dated government bonds, short dated corporate bonds and selected funds with low portfolio duration where appropriate. Bonds will generally be of 5 year maturity or less and the average portfolio maturity will generally be 3 years or less. Substantial exposure to gilts and deposits may also be held from time to time.

INVESTMENT COMMENT

July was a good month in the equity markets as strong macroeconomic data and a solid corporate earnings season buoyed the US, whilst Eurozone markets benefitted from diminishing concerns around a trade dispute with America. Although the initial U.S. tariffs will have only a minor impact on Japan, the U.S. administration's recent exploration of tariffs on Japanese car exports is more threatening. In the UK, Sterling continued to weaken given the continuing uncertainty around Brexit, which provided a boost to the globally-oriented FTSE100. The European Central Bank (ECB) announced its intention to cap its quantitative easing program, anticipating reducing its asset purchases from EUR30b per month to EUR15b per month in October and then to zero in December. Though the new forward guidance has raised expectations of an interest rate hike in late 2019, uncertainty in the outlook suggests the first rate hike will be delivered later rather than sooner.
