STRATEGY DESCRIPTION

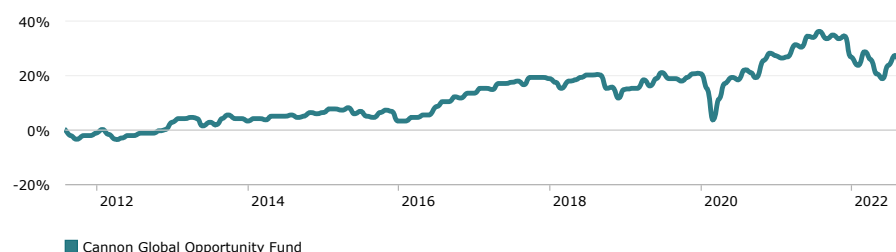

The investment objective of the Fund is long term capital growth which the Fund had, until January 2022, sought to achieve by investing in a multi-asset portfolio of securities.

As of January 2022, the strategy of the Fund has switched to replicate Cannon Capital Advisor's (CCA) preferred list or model portfolio of equity funds, alongside a minor holding in gold. The change of strategy was implemented in order to provide all clients with the opportunity to gain extensive diversification and exposure to global equity markets regardless of portfolio size.

Due to the various iterations the Fund has taken since inception, benchmarking has been a challenge. Supplementary documentation is available upon request to show how the Fund has performed against the MSCI World Index from January 2022.

As at the end of September, the MSCI World 100% Hedged to GBP Net Total Return Index had returned -22.58% in the year-to-date.
